

Cover Up

Building Fluency: adding/subtracting within 20

Materials: gameboard for each player, cubes, die

Number of Players: 2-3

Directions:

1. Players take turns.
2. Each turn, a player rolls a die, collects that number of markers, and places the markers on their gameboard.
3. Each turn, the player tells how many markers are on their gameboard.
4. Then, the player tells how many more markers they need to cover the board completely.
5. The first player to cover the board exactly is the winner.

Variation/Extension: Players can begin with the gameboard covered and remove cubes on each roll. Then tell how many cubes are on the board and how many more need to be removed to uncover the board completely.
