

Array Tic-Tac-Toe

Objective: To be the first player to match numbers to an array so that a row, a column, or a diagonal of arrays is marked with your symbol (X or O).

Materials (per 2 players):

- Array Tic-Tac-Toe board
- Dice (alternative is to have a spinner)

Directions:

1. For each turn, a player rolls the dice and adds the numbers to get the sum (or spins the spinner). The player looks for an array with that number of dots and places an X or an O on that array. If there is no array, the player's turn ends.
2. The first player to turn a card facedown so that a row, column, or diagonal of arrays is all marked with his/her symbol wins.
