

GEOMETRY SCAVENGER HUNT

Directions:

Try to find examples of each polygon in the classroom or at home. List each example you find and clearly describe where you found it.

Item	Examples
Triangle	
Rectangle	
Parallelogram (not a rectangle or rhombus)	
Rhombus (not a square)	
Square	
Trapezoid	
Pentagon	
Hexagon	
Decagon	

PROPERTIES OF SHAPES HUNT

Directions:

You will be given one or more of the properties below. Check the one(s) you are given.

Parallel Lines

Right Angles

Acute Angles

Obtuse Angles

Curved surfaces or curved lines

Shapes with "dents" (concave)

Shapes without "dents" (convex)

Solids like a box (cube or rectangular prism)

Solids like a cylinder

Solids like a pyramid

Shapes with line symmetry

Shapes with rotational symmetry

Look for examples of shapes with that property. Clearly identify the object or item with that property. List them below or on another paper.
