

Dear Parents/Guardians,

An important mathematics skill is knowing number combinations. We have assessed your child's knowledge of the number combinations to 10. Listed below is the number that your child needs to master. For example if 5 is listed that means your child needs to know all the combinations that make five (5+0, 4+1, 3+2, 2+3, 1+4, 0+5). Students need to know what "parts" make up five.

The way we assess this in class is show the child 5 cubes or beans. We hide part of them and then show the rest and ask how many are hidden. If we hide 4 we show 1 and the child responds "4". The child must immediately respond. If time is spent counting how many are hidden, the child does not know the combinations for 5.

Please have your child practice these combinations at home. When he/she feels ready we will retest. We'll let you know when your child is ready to move to the next number combination.

Please let me know if you have any questions.

Your child needs to work on the combinations for 4.

#### Fours

$0 + \underline{\quad} = 4$

$\underline{\quad} + 0 = 4$

$4 - 0 = 4$

$1 + \underline{\quad} = 4$

$\underline{\quad} + 1 = 4$

$4 - 1 = 3$

$2 + \underline{\quad} = 4$

$\underline{\quad} + 2 = 4$

$4 - 2 = 2$

$3 + \underline{\quad} = 4$

$\underline{\quad} + 3 = 4$

$4 - 3 = 1$

$4 + \underline{\quad} = 4$

$\underline{\quad} + 4 = 4$

$4 - 4 = 0$

Dear Parents/Guardians,

An important mathematics skill is knowing number combinations. We have assessed your child's knowledge of the number combinations to 10. Listed below is the number that your child needs to master. For example if 5 is listed that means your child needs to know all the combinations that make five (5+0, 4+1, 3+2, 2+3, 1+4, 0+5). Students need to know what "parts" make up five.

The way we assess this in class is show the child 5 cubes or beans. We hide part of them and then show the rest and ask how many are hidden. If we hide 4 we show 1 and the child responds "4". The child must immediately respond. If time is spent counting how many are hidden, the child does not know the combinations for 5.

Please have your child practice these combinations at home. When he/she feels ready we will retest. We'll let you know when your child is ready to move to the next number combination.

Please let me know if you have any questions.

Your child needs to work on the combinations for 5.

### Fives

$0 + \underline{\quad} = 5$

$\underline{\quad} + 0 = 5$

$5 - 0 = 5$

$1 + \underline{\quad} = 5$

$\underline{\quad} + 1 = 5$

$5 - 1 = 4$

$2 + \underline{\quad} = 5$

$\underline{\quad} + 2 = 5$

$5 - 2 = 3$

$3 + \underline{\quad} = 5$

$\underline{\quad} + 3 = 5$

$5 - 3 = 2$

$4 + \underline{\quad} = 5$

$\underline{\quad} + 4 = 5$

$5 - 4 = 1$

$5 + \underline{\quad} = 5$

$\underline{\quad} + 5 = 5$

$5 - 5 = 0$

Dear Parents/Guardians,

An important mathematics skill is knowing number combinations. We have assessed your child's knowledge of the number combinations to 10. Listed below is the number that your child needs to master. For example if 5 is listed that means your child needs to know all the combinations that make five (5+0, 4+1, 3+2, 2+3, 1+4, 0+5). Students need to know what "parts" make up five.

The way we assess this in class is show the child 5 cubes or beans. We hide part of them and then show the rest and ask how many are hidden. If we hide 4 we show 1 and the child responds "4". The child must immediately respond. If time is spent counting how many are hidden, the child does not know the combinations for 5.

Please have your child practice these combinations at home. When he/she feels ready we will retest. We'll let you know when your child is ready to move to the next number combination.

Please let me know if you have any questions.

Your child needs to work on the combinations for 6.

### Sixes

$0 + \underline{\quad} = 6$

$\underline{\quad} + 0 = 6$

$6 - 0 = 6$

$1 + \underline{\quad} = 6$

$\underline{\quad} + 1 = 6$

$6 - 1 = 5$

$2 + \underline{\quad} = 6$

$\underline{\quad} + 2 = 6$

$6 - 2 = 4$

$3 + \underline{\quad} = 6$

$\underline{\quad} + 3 = 6$

$6 - 3 = 3$

$4 + \underline{\quad} = 6$

$\underline{\quad} + 4 = 6$

$6 - 4 = 2$

$5 + \underline{\quad} = 6$

$\underline{\quad} + 5 = 6$

$6 - 5 = 1$

$6 + \underline{\quad} = 6$

$\underline{\quad} + 6 = 6$

$6 - 6 = 0$

Dear Parents/Guardians,

An important mathematics skill is knowing number combinations. We have assessed your child's knowledge of the number combinations to 10. Listed below is the number that your child needs to master. For example if 5 is listed that means your child needs to know all the combinations that make five (5+0, 4+1, 3+2, 2+3, 1+4, 0+5). Students need to know what "parts" make up five.

The way we assess this in class is show the child 5 cubes or beans. We hide part of them and then show the rest and ask how many are hidden. If we hide 4 we show 1 and the child responds "4". The child must immediately respond. If time is spent counting how many are hidden, the child does not know the combinations for 5.

Please have your child practice these combinations at home. When he/she feels ready we will retest. We'll let you know when your child is ready to move to the next number combination.

Please let me know if you have any questions.

Your child needs to work on the combinations for 7.

### Sevens

$0 + \underline{\quad} = 7$

$\underline{\quad} + 0 = 7$

$7 - 0 = 7$

$1 + \underline{\quad} = 7$

$\underline{\quad} + 1 = 7$

$7 - 1 = 6$

$2 + \underline{\quad} = 7$

$\underline{\quad} + 2 = 7$

$7 - 2 = 5$

$3 + \underline{\quad} = 7$

$\underline{\quad} + 3 = 7$

$7 - 3 = 4$

$4 + \underline{\quad} = 7$

$\underline{\quad} + 4 = 7$

$7 - 4 = 3$

$5 + \underline{\quad} = 7$

$\underline{\quad} + 5 = 7$

$7 - 5 = 2$

$6 + \underline{\quad} = 7$

$\underline{\quad} + 6 = 7$

$7 - 6 = 1$

$7 + \underline{\quad} = 7$

$\underline{\quad} + 7 = 7$

$7 - 7 = 0$

Dear Parents/Guardians,

An important mathematics skill is knowing number combinations. We have assessed your child's knowledge of the number combinations to 10. Listed below is the number that your child needs to master. For example if 5 is listed that means your child needs to know all the combinations that make five (5+0, 4+1, 3+2, 2+3, 1+4, 0+5). Students need to know what "parts" make up five.

The way we assess this in class is show the child 5 cubes or beans. We hide part of them and then show the rest and ask how many are hidden. If we hide 4 we show 1 and the child responds "4". Please have your child practice these combinations at home. When he/she feels ready we will retest. We'll let you know when your child is ready to move to the next number combination.

Please let me know if you have any questions.

Your child needs to work on the combinations for 8.

### Eights

$0 + \underline{\quad} = 8$

$\underline{\quad} + 0 = 8$

$8 - 0 = 8$

$1 + \underline{\quad} = 8$

$\underline{\quad} + 1 = 8$

$8 - 1 = 7$

$2 + \underline{\quad} = 8$

$\underline{\quad} + 2 = 8$

$8 - 2 = 6$

$3 + \underline{\quad} = 8$

$\underline{\quad} + 3 = 8$

$8 - 3 = 5$

$4 + \underline{\quad} = 8$

$\underline{\quad} + 4 = 8$

$8 - 4 = 4$

$5 + \underline{\quad} = 8$

$\underline{\quad} + 5 = 8$

$8 - 5 = 3$

$6 + \underline{\quad} = 8$

$\underline{\quad} + 6 = 8$

$8 - 6 = 2$

$7 + \underline{\quad} = 8$

$\underline{\quad} + 7 = 8$

$8 - 7 = 1$

$8 + \underline{\quad} = 8$

$\underline{\quad} + 8 = 8$

$8 - 8 = 0$

Dear Parents/Guardians,

An important mathematics skill is knowing number combinations. We have assessed your child's knowledge of the number combinations to 10. Listed below is the number that your child needs to master. For example if 5 is listed that means your child needs to know all the combinations that make five (5+0, 4+1, 3+2, 2+3, 1+4, 0+5). Students need to know what "parts" make up five.

The way we assess this in class is show the child 5 cubes or beans. We hide part of them and then show the rest and ask how many are hidden. If we hide 4 we show 1 and the child responds "4". Please have your child practice these combinations at home. When he/she feels ready we will retest. We'll let you know when your child is ready to move to the next number combination.

Please let me know if you have any questions.

Your child needs to work on the combinations for 9.

### Nines

$0 + \underline{\quad} = 9$

$\underline{\quad} + 0 = 9$

$9 - 0 = 9$

$1 + \underline{\quad} = 9$

$\underline{\quad} + 1 = 9$

$9 - 1 = 8$

$2 + \underline{\quad} = 9$

$\underline{\quad} + 2 = 9$

$9 - 2 = 7$

$3 + \underline{\quad} = 9$

$\underline{\quad} + 3 = 9$

$9 - 3 = 6$

$4 + \underline{\quad} = 9$

$\underline{\quad} + 4 = 9$

$9 - 4 = 5$

$5 + \underline{\quad} = 9$

$\underline{\quad} + 5 = 9$

$9 - 5 = 4$

$6 + \underline{\quad} = 9$

$\underline{\quad} + 6 = 9$

$9 - 6 = 3$

$7 + \underline{\quad} = 9$

$\underline{\quad} + 7 = 9$

$9 - 7 = 2$

$8 + \underline{\quad} = 9$

$\underline{\quad} + 8 = 9$

$9 - 8 = 1$

$9 + \underline{\quad} = 9$

$\underline{\quad} + 9 = 9$

$9 - 9 = 0$

Dear Parents/Guardians,

An important mathematics skill is knowing number combinations. We have assessed your child's knowledge of the number combinations to 10. Listed below is the number that your child needs to master. For example if 5 is listed that means your child needs to know all the combinations that make five (5+0, 4+1, 3+2, 2+3, 1+4, 0+5). Students need to know what "parts" make up five.

The way we assess this in class is show the child 5 cubes or beans. We hide part of them and then show the rest and ask how many are hidden. If we hide 4 we show 1 and the child responds "4". The child must immediately respond. If time is spent counting how many are hidden, the child does not know the combinations for 5.

Please have your child practice these combinations at home. When he/she feels ready we will retest. We'll let you know when your child is ready to move to the next number combination.

Please let me know if you have any questions.

Your child needs to work on the combinations for 10.

### Tens

$0 + \underline{\quad} = 10$

$\underline{\quad} + 0 = 10$

$10 - 0 = 10$

$1 + \underline{\quad} = 10$

$\underline{\quad} + 1 = 10$

$10 - 1 = 9$

$2 + \underline{\quad} = 10$

$\underline{\quad} + 2 = 10$

$10 - 2 = 8$

$3 + \underline{\quad} = 10$

$\underline{\quad} + 3 = 10$

$10 - 3 = 7$

$4 + \underline{\quad} = 10$

$\underline{\quad} + 4 = 10$

$10 - 4 = 6$

$5 + \underline{\quad} = 10$

$\underline{\quad} + 5 = 10$

$10 - 5 = 5$

$6 + \underline{\quad} = 10$

$\underline{\quad} + 6 = 10$

$10 - 6 = 4$

$7 + \underline{\quad} = 10$

$\underline{\quad} + 7 = 10$

$10 - 7 = 3$

$8 + \underline{\quad} = 10$

$\underline{\quad} + 8 = 10$

$10 - 8 = 2$

$9 + \underline{\quad} = 10$

$\underline{\quad} + 9 = 10$

$10 - 9 = 1$

$10 + \underline{\quad} = 10$

$\underline{\quad} + 10 = 10$

$10 - 10 = 0$
