_____ _____ _____ **Close to 900** _____ _____ _____

_____ _____ _____ _____ _____ _____ _____ _____ _____
Close to 1000

_____ _____ _____ _____ _____ _____ _____ _____ _____
Close to 4500

Take turns drawing a tile. You may place it anywhere on the gameboard - your side or your opponents' side. The winner is the person who comes closest to the target numbers when all spaces are filled.

Naughty Ned's Number Tiles

adapted from Marcy Cook

1 bag of tiles (0-9) or 2- 3 sets of cards (0-9)

2 players take turns getting a tile or card from the bag or pile of cards

Players choose where to write that number. Players do not have to place the digit in one of their own boxes but may "dump" it in any available box (your own box or any player's box). Return the tile or card to the pile.

The play continues until all 6 boxes have been filled. The player with the largest number scores 4. The other player scores 2.
