

Capturing Hexagon Cookies

Number of players: Two

Materials: Game board for each player, pattern blocks, and game cards (optional crayons)

Directions: Players take turns drawing a card and placing the appropriate pattern block on any hexagon on the game board. During a turn (after drawing a card) players should “trade up” to always have the fewest number of blocks possible on the game board. When a hexagon has been covered completely, it may be colored if the game board is consumable. The winner is the first player to capture all hexagons on the game board.
