FOUR'S A WINNER

Materials: Four's A Winner Gameboard
Set of 2 different colored markers
Two paper clips or transparent markers

Players: 2 players or 2 teams

Objective: Practice multiplication and division facts

Winner: The first player to have 4 markers in a row vertically, horizontally, or diagonally

Directions:

Player A chooses a number from the list at the bottom of the gameboard as a factor and places a paper clip on the number.

Player B chooses a number (it may be the same one as the other factor) and placed a paper clip on it.

Player B then multiplies the two numbers and places a marker on the product.

Play continues in this manner until one player has 4 markers in a row vertically, horizontally, or diagonally.

A particular product may be used only once per game.
