

Pour It On

- Pour water from the bottle into an empty bowl, stopping when you think you have poured a cup.
- Use the measuring cup to check.
- Repeat to see if you can get better.
- Try to pour a pint, a quart, into the bowl.
- Pour the water back into the bottle for the next group.

Pour It On

1. Did you get better as you practiced pouring? Why?
2. What strategies did you use to estimate a pint?
3. What strategy would you use if you were asked to pour a gallon?

Which is a Quart?

- Sort the containers into three groups
 - Containers that hold less than a quart
 - Containers that hold more than a quart
 - Containers that hold about a quart
- Measure the capacity of each to determine if you sorted the containers correctly.
- Record the number of correct responses for your group on the line plot.

Which is a Quart?

Use a dot to record the number of containers you correctly categorized.

0 1 2 3 4 5 6 7 8
