

Wrist to Elbow

- Measure the distance from the bend in the arm to the bend in the wrist for each group member in both inches and centimeters.
- Record the results on the chart.
- Get in order from longest to shortest wrist/elbow distance. Is there a relationship between height and wrist/elbow distance?
- Is the number of inches or the number of centimeters larger? Why?

WRIST TO ELBOW

Each group member will record the distance from your wrist to the bend in your arm.

Name	Results in Centimeters	Results in Inches

Did your group find a relationship between height and wrist to elbow length?
