

## Drop It In

- Drop a given number of objects through the slit in the box as students count out loud
- Each child will whisper in the teacher's ear the number of objects that are in the box
- Lift the box and ask, "How many objects do you see?"
- Students will whisper their answer

## Roll for 5

- Roll 5 dice
- Place any dice that show five over to the side with the five still showing
- Continue rolling dice and removing dice with fives until all dice have been moved to the side
- How many turns did it take to roll all fives?
- How can the number of turns be recorded?
